### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Paradies on April 20, 2011.

The application has been amended as follows:

The abstract has been reduced in length and now reads as follows:

The design and attachment of an insulation package near the fuselage structure to protect the cabin region of an aircraft against fire acting on the insulation package from outside the aircraft environment, thus clearly facilitating evacuation of the passengers from the vehicle. The insulation package arrangement may comprise several fuselage insulation packages of an elongated form. These packages may adjoin the aircraft fuselage structure in the direction of the longitudinal axis of the aircraft. They may be completely enclosed by a burn-through-proof foil which is arranged in a space enclosed by interior paneling and by the panels of the outer skin. The longitudinal end of the fuselage insulation package continues outward with a flat insulation end section is attached which is attached to a rib-attachment region arranged below the respective longitudinal sides of a rib and near the stringer by means of burn-through-proof attachment elements arranged on the inside of the aircraft with respect to the insulation.

.The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or suggest the invention as claimed including a first attachment element passing through a hole in a rib such that first and second retainer ends are on opposing sides of the rib, wherein the first retainer end attaches a first flat end section of a first fuselage insulation package and a second flat end section of a second insulation package to one side of the rib attachment region such that a portion of the first package overlaps with or is overlapped by the second package and the first package is also retained on the opposite side of the rib attachment region by the second retainer end and wherein a second attachment element shaped as a truncated-cone body and comprising an insulated disc element with a disc-shaped core element embedded in a casing.

The presentation, "Informational Material on Burnthrough" does teach both a method of overlap at fuselage ribs (page 4) and the use of a through-frame fastener (page 7), though it does not disclose the use of through-frame fasteners in overlapped configuration or in any of the "Configurations that Meet the Requirement" (pages 12-21), nor does the presentation disclose the first and second attachment elements as claimed. No prior art of record teaches the claimed attachment elements with a burn-through-proof insulation arrangement or in an analogous environment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Information Disclosure Statement***

The information disclosure statement filed 7/20/2010 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Copies of foreign patent documents EP 1,134,479; EP 1,164,006; and WO 9,112,131 have not been provided or previously made of record in the application.

However, in the interest of compact prosecution the references have been considered and are listed on the PTO-892 form included with this action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard R. Green whose telephone number is (571)270-5380. The examiner can normally be reached on Monday - Friday 9:00 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Collins can be reached on (571)272-6886. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
